The Ultimate way to Reman!

HAS YOUR FAN CLUTCH

FAILED TOO SOON

The New Torque Leader Solves the Problem!

Our GoldTop® is unmatched by any competitors (new or remanufactured) & packs over 5,000 inch-pounds of Torque!

We developed the GoldTop® Rebuild Kit to out-perform the competition!

Highest Torque Rating

With over 5,000 inch-pounds of torque, the GoldTop® Rebuild Kit will handle all fan blades!!

Less Time To Install

Our exclusive design combines nine separate components into **ONE FINAL ASSEMBLY** – this dramatically reduces installation time and installation errors.

Higher Quality Internal Components

- Kevlar® impregnated friction material
- 4-point urethane seal
- Elimination of two seals equals two less leak paths
- Cast on cast construction reduces corrosion and wear

Lower Cost

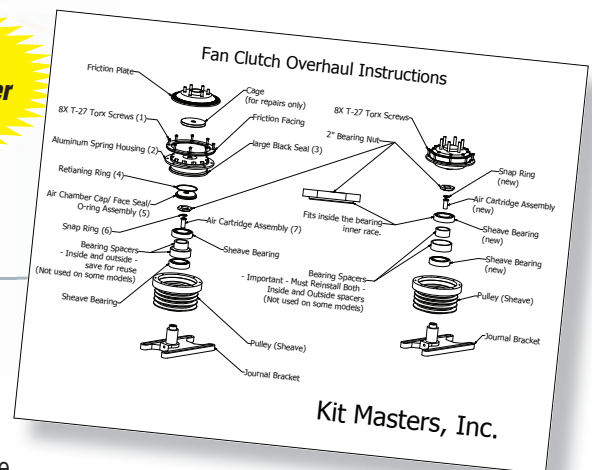

Upgrading your fan clutch is as simple as installing the GoldTop® Rebuild Kit.

- Less failures
- Less time to install

Compare to the Alternative

Kit Masters patented GoldTop® reduces nine components into **one component assembly**, saving significant installation time and reducing the risk of installation errors.

Kit Masters, Inc.

Competitive Advantage

Two O-Rings are Better than One!
 Plus, our High-Torque 8801X is engineered to outlast the competition.

Kit Masters' 8801X extended shaft allows for the addition of a urethane o-ring for resilience to motion, and a Viton® o-ring to create a superior air barrier.

8801X Shaft Design allows for **DUAL SEAL PROTECTION**

At Kit Masters we are always striving to make good products even better.

That is why we made our 8801X remanufactured fan clutch the highest torque rated K26 replacement on the market.
