# CATALOG ILLUSTRATION DISCLAIMER

The Meritor Product Photo and Illustration Sections are to be used as a supplemental aid in identifying the configurations and specifications of many of the air systems-related parts found in this catalog.

## CAUTION

**IN NO CASE SHOULD THESE PICTURES & ILLUSTRATIONS BE USED TO MAKE PRODUCT SUBSTITUTIONS. USE THE APPROPRIATE CATALOG APPLICATION DATA TO DETERMINE THE CORRECT PART.**

These illustrations are intended to show the configurations of **Meritor parts only**. The outward appearance of these parts may or may not match OEM or competitive parts.

The Photographs and Illustrations shown in this catalog are typical and may vary slightly in detail from actual parts due to manufacturing tolerances, and/or OEM design differences. The general configuration of the part will be the same, i.e. port positions, mounting holes, etc.

Many parts may have the same external dimensions, but have different internal dimensions and/or materials. These differences make it imperative that only the applications guide be used to determine the suitability of a particular part.

**MANY PARTS THAT SEEM SIMILAR ARE DIFFERENT AND SHOULD NOT BE INTERCHANGED. AGAIN, NOTE THAT THE PHOTO AND ILLUSTRATION SECTION IN THIS CATALOG IS NOT TO BE USED TO MAKE PRODUCT SUBSTITUTIONS, BUT TO IDENTIFY CONFIGURATIONS AND APPLICATIONS.**

## TRADEMARK ACKNOWLEDGEMENTS

The names of original manufacturers, their models or product types, part numbers, and other product information used in this catalog is solely for the purpose of assisting customers to identify the appropriate Meritor part number.

## SYSTEM SAVER AIR COMPRESSORS

**System Saver 250**

**System Saver 318**

**System Saver 636**

### Features and Benefits:

- Greater air output
  - System Saver 250–15.2 cfm
  - System Saver 318–18.7 cfm
  - System Saver 636–37.4 cfm
- Higher air delivery efficiency means more air delivery per horsepower absorbed, lower compressor duty cycles and lower fuel consumption
- Superior piston and bore finishing technology reduces oil consumption up to 90%, significantly reduces system contamination and extends air system component life
- Exclusive sliding-leaf unloading mechanism lowers unloaded inlet temperatures, reduces carbonization and contamination, and various models are turbocharging compatible
- Governor or Discharge Line Unloader controlled for air system control flexibility
- Aluminum cylinder head construction improves cooling, reduces weight and decreases carbon formation
- Up to 30% smaller size makes installation easier in limited spaces and delivers higher volumetric efficiency
- Various models include an integral pressure relief valve (no external valve required) to minimize excessive pressure buildup and potential compressor damage, and eliminate freeze-up failures
- Lower discharge temperatures reduce carbonization and system contamination, and allow for higher air pressure system capability

### System Saver 1200 Air Dryer

- Product functions with normal brake systems and requires no additional reservoirs
- Available with turbo cut-off valve to prevent leakage of turbo boost pressure and discharge line unloading options
- Lightweight-design System Saver 1200 – 11.1 pounds; 17 pounds lighter than the competition

### System Saver 1200P and 1800P Air Dryers

- These products are specially designed for use with a dedicated purge tank and are ideal for applications calling for frequent starts and stops and long compressor cycles
- Both are available with turbo cut-off valves to help prevent leakage of turbo boost pressure and discharge line unloading options
- The System Saver 1800P provides increased drying capacity for heavier-duty applications
- Lightweight-design System Saver 1200P – 10.4 pounds; System Saver 1800P – 12.4 pounds

### System Saver Twin™ Air Dryer

- Sequential two-cartridge system allows one to regenerate while the other continues to dry the air
- Designed for compressors that operate almost continuously and for trucks with several air accessories or central tire inflation systems
- Ideal for naturally aspirated compressor applications
- Smallest continuous-duty dryer available
- Lightweight design weighs only 22 pounds

## BENDIX PP-3 CONTROL VALVE

Push Pull Valve - Manually operable - Pressure sensitive, on/off valves which will automatically return to the button out (exhaust) position when supply pressure is below the required minimum. The PP-3 has a tripper that exhausts at 30 psi and charges above 50 psi. The plunger trips at 40 psi and charges manually. The tripper prevents manual override of the emergency application of the parking brakes.

## BENDIX PP-5 CONTROL VALVE

Push Pull Valve - Manually operable - Pressure sensitive, on/off valves which will automatically return to the button out (exhaust) position when supply pressure is below the required minimum. PP-5\* Used in conjunction with vehicle torque converter systems, engine speed control systems, and some parking systems. In addition to manual control it employs a pilot air release feature which will allow the valve to be exhausted by applying a low pressure signal from another control valve to the control port.

## BENDIX PP-7 CONTROL VALVE

Push Pull Valves - Manually operable - Pressure sensitive, on/off valves which will automatically return to the button out (exhaust) position when supply pressure is below the required minimum. The PP-7 features an air operated control in the lower body that provides an application of the trailer brakes when the emergency tractor brake system is applied. ## BENDIX TW-2 AND TH-3 CONTROL VALVES

Lever Type Valves - Manually operated valves. Usually dash mounted with either 2 or 3 lever positions. They are also available in cable control configuration. These valves are used primarily to control parking and emergency brakes. The TW-2 and TH-3 are similar to the TW-1 except that two valves are housed in the same body. The TW-2 has 2 lever positions and the TH-3 has 3 lever positions. The lever controls both valves.

## BENDIX MV-2 CONTROL MODULE

**MV2 Module**

**Spool Assy. A**

**Spool Assy. B**

Control Module - Integrated control assembly normally mounted in the control panel of a truck tractor. It provides all the federal legal requirements for trailer air supply and parking brake control. It also permits the tractor parking brakes to be applied while air supplied to the trailer. The MV-2 consists of two push pull valves and a dual circuit supply valve. The valve is serviced by replacing the complete spool inserts shown above. The complete valve and the two spool assemblies are available.

### BENDIX E-1 FOOT VALVE (Single Circuit)

Single Circuit Foot Valve - Normally used on pre FMVSS-121 vehicles. It is foot operated and controls the delivery of air to the brake chambers. Simply stated it provides the driver with a means of applying and releasing the brakes on a vehicle. The E-1 brake floor mounted and can be treadle or lever actuated. Used on pre-FMVSS-121 single circuit air brake system.

## BENDIX SR-4 SPRING BRAKE VALVE (New Type)

Spring Brake Valve - A dual function valve. (1) limits hold-off pressure to the spring brakes via a relay of quick release valve, generally 90 -95 psi. (2) Should a loss of pressure occur it provides a modulated spring brake application proportional to the service braking pressure delivered to the front axle. Commonly used on post FMVSS-121 systems.

## MIDLAND FF2 FULL FUNCTION (Spring Brake/Relay Valve)

Spring Brake Valve - A dual function valve. (1) limits hold-off pressure to the spring brakes via a relay of quick release valve, generally 90-95 psi. (2) Should a loss of pressure occur it provides a modulated spring brake application proportional to the service braking pressure delivered to the front axle. Commonly used on post FMVSS-121 systems.

**Note:** A heavy duty walled 1/2" or 3/8" nipple must be used when mounting the Midland FFV.

The Midland Full Function Valve can be used with a single air tank, twin tanks or an axle by axle system on trailers. The valve combines a pressure protection valve, two one way check valves, spring brake valve with quick release, and a four port relay valve. Midland Full Function Valves must not be mixed with other service valves on the same trailer.

The Midland Full Function Valve does not release spring brakes until the reservoir is filled. This may take up to 90 seconds. Do not attempt to drive away prior to full spring brake release. Damage to the foundation brake system may result.

Tractor Protection Valve - Protects the tractor air brake system under trailer breakaway conditions and conditions where severe leakage has occurred in the tractor or trailer. The valve is also used to shut off trailer service and supply lines before disconnecting the tractor from the trailer. The tractor protection valve is used in conjunction with a dash mounted control valve.

Used on pre FMVSS-121 vehicles in conjunction with TW-1 or PP-1 Valves. Regulations require the tractor protection system to function automatically between 20 and 45 psi as system pressure is reduced. The automatic system to accomplish this is built into the TP-2.

Tractor Protection Valve - Protects the tractor air brake system under trailer breakaway conditions and conditions where severe leakage has occurred in the tractor or trailer. The valve is also used to shut off trailer service and supply lines before disconnecting the tractor from the trailer. The tractor protection valve is used in conjunction with a dash mounted control valve.

The TP-4 is used exclusively on Ford "L" model tractors and combines several functions. It is a combination of a tractor protection valve and two double check valves. This valve allows either of the two service brake circuits on the vehicle to apply the trailer brakes. It is used in conjunction with a PP-3 or PP-7 to perform the normal functions of a tractor protection valve. Porting for the installation of the stoplight switch, front axle limiting valve and the trailer emergency stoplight switch is incorporated in the valve.

## AIR HOSES

### FUNCTION

Air brake tubes and hoses are the arteries of a vehicle's air system. Their purpose is to transfer air from the air tanks to valves and brake chambers. They are designed to carry the correct volume and pressure to assure balanced effective braking. Tubing and hose are used for different purposes even though they perform the same task. Tubing is manufactured out of stiff materials like copper and nylon and are used on the vehicle where no movement occurs. Hose is manufactured to work with the vehicle's suspension, connections, and points of movement. Layers of synthetic rubber and synthetic reinforcement give hose its strength and flexibility (See Figure 14).

Figure 14

This design meets United States Department of Transportation (DOT), Society of Automotive Engineers, and the National Highway Traffic Safety Administration requirements.

### INSPECTION

An air leak is usually a sign that a hose needs repair or replacing. Hearing an air leak is not the only reason for replacing an air hose. Prevention of your vehicle being put "out of service" on the road is another reason. "Out of service" criteria is in place to prevent problems associated with hose failure on the highway. Brake lock up, tire flat spotting, brake imbalance and accidents are a few of those problems. The published out of service criteria includes the following reasons:

1. Bulging and/or swelling with air applied.
2. Improper splice - hose forced over pipe and using hose clamps to secure.
3. Crimp, twist or turn causing restrictions.
4. Cut, wear, damage through rubber cover and outer reinforcement ply.

Some manufacturers will use small vent holes to eliminate air from between the cover layer and the third and fourth spiral reinforcement layers. These vent holes will cause no problems in the life of the hose the safety of the vehicle, and do not represent an "out of service" condition

Figure 15

# AIR BRAKE HOSE ASSEMBLIES

Meritor Air Hose Assembly part numbers consist of a four digit base number followed by a dash and two additional digits. The four digit base number designates the size of the air hose and type of end fittings. The last two digits designate the overall length of the hose, "A" above. ## POLYURETHANE GLADHAND SEALS

- UV Resistant
- Petroleum Resistant
- Acid Resistant
- Ozone Resistant
- Salt Resistant
- Abrasion Resistant

**INDEPENDENT LABORATORY TESTED TO OPERATE IN EXTREME COLD CLIMATE CONDITIONS TO -35°F (-37°C)**

**Made in U.S.A.**

Tests results prove that polyurethane gladhand seals withstand the rugged conditions of on-highway roads much longer than traditional rubber gladhand seals. Minimize downtime with Meritor Polyurethane Gladhand Seals!

# MERITOR WABCO

## ANTI-LOCK BRAKING SYSTEMS FOR TRACTORS

### Features and Benefits:

- Simple diagnostics provide three options: PC-based TOOLBOX™ Software, standard blink code or Pro-Link® 9000
- Redundant circuit design increases reliability and safety
- High sensor signal strength protects against electromagnetic and radio frequency interference
- Front ABS valve package combines ABS modulator valves with quick-release valve functions
- Rear ABS valve package with optional ATC requires less maintenance than competitive systems
- Optional Power Line Carrier (PLC) provides drivers with critical trailer information via the Meritor WABCO InfoLink™ Gateway which links tractor and trailer systems
- ABS valves optional with integrated QR feature

# Meritor WABCO Enhanced Easy-Stop™ Trailer ABS

As the industry's recognized leader in trailer ABS, Meritor WABCO has created a series of retrofit kits to replace the previous Easy-Stop platform, to the current production Enhanced Easy-Stop platform. Easy Stop was installed on production built trailers between March 1997 and February 2001. Enhanced Easy-Stop incorporated current technology to address regulatory PLC requirements and has been installed from March 2001 to present.

Enhanced Easy-Stop ABS provides unparalleled trailer monitoring and control capabilities that fleets and owner-operators count on to positively impact their bottom line.

To determine the proper kit to order, find the existing Easy-Stop ECU/Valve part number that needs to be replaced. Then determine if you will pull the diagnostics from the tractor (power adapter equipped kits) or from the trailer (power/diagnostic adapter equipped kits).

## Meritor WABCO Easy-Stop™ Trailer ABS Update Kit

Easy-Stop ECU/Valve#	Description	Power AdapterRetrofit Kit	Power/Diagnostic Adapter Retrofit Kit

472 500 013 0	4S/3M	R955346	R955347

- If a 472 500 012 0 ECU/Valve was used in 2S/1M applications, order a R955344 or R955345 kit. Kits contain an Enhanced Easy-Stop ECU/Valve and either a power cable adapter or power/diagnostic cable adapter.

Additionally consider protecting the life of the new ECU/valve by utilization the in-line filter that protects the Trailer's ABS System by:

- Mounts at the control and service gladhands, part number S432 500 005 0
- Decreases contamination of the valves by (1) tractor air pass-through or (2) the gladhands remaining in the open position and allowing debris to enter on that basis
- By-pass feature if filter becomes full
- Filter can be cleaned with soap & water and reused
- S899 201 842 4 is a label to mount on the trailer
- S100 100 002 4 is an available tool to clean the filter

# How To Identify The Retrofit Kit Needed To Convert A Wabash Trailer.

First, check the trailer to see if the sensors are visible on the axle spindles—this will determine the kit that's right for the trailer.

If the sensors are visible on the axle spindles, the trailer is equipped with MBS-1 or MBS-1P. If the sensors are not visible, the trailer is equipped with MBS-2.

For MBS-1 or MBS-1P, if the trailer currently does not have Meritor WABCO sensor cables, the

appropriate complete retrofit kit must be ordered.

For MBS-2, if tone rings will be pressed onto the existing hubs, then order the appropriate retrofit kit with tone rings. If new hub assemblies with tone rings are preferred for this installation, then order the appropriate retrofit kit without tone rings as well as the appropriate hub assemblies.

# Meritor WABCO ABS Options for Trailers

## PLC Display and Command Center

Our in-cab PLC Display shows real-time data transfer between tractor and trailer systems equipped with Power Line Carrier (PLC) communications and Enhanced Easy-Stop Trailer ABS with InfoLink.

## DataMaster

For more complete troubleshooting, this handheld device makes data extraction of vital trailer stats easy. Connects to trailer's J560 connector, displays ABS status codes, trailer ID and odometer readings for up to 255 trailers.

## In-Line Filter

Prevents damaging particles from entering the trailer's air brake system.

## Roll Stability Support

A dedicated electronic trailer stability support system works with your trailer ABS to reduce the likelihood of vehicle rollover. RSS monitors vehicle lateral acceleration and automatically applies the trailer brakes when an established threshold indicating a potential for a rollover is reached. The RSS system can apply full brake force to the outside wheels while applying lower pressure to the inner wheels.

For maximum directional control and stability, combine our dedicated trailer stability support system (RSS) with either an RSC or ESC tractor stability system.

## **MERITOR AFTERMARKET PARTS WARRANTY**

We warrant all new parts for one year from date of shipment to the buyer against defective material or workmanship (but not against damage caused by accident, abuse or improper installation, maintenance or repair) when such parts are used on vehicles the specifications of which have been approved by our Engineering Department.

As the exclusive remedy under this warranty, we will, at our option, repair or replace such parts free of charge, or take back the nonconforming parts and refund the monies paid by buyer for such parts, if found on examination by us to be nonconforming and if any necessary return charges are prepaid.

If it is necessary to return any parts under this warranty, buyer agrees not to make any deduction on account thereof from remittances on current accounts while claims are in the process of disposition. Any expense incurred without our consent for repairs or replacement will not be allowed.

**THIS WARRANTY IS EXPRESSLY IN LIEU OF ALL OTHER WARRANTIES OR CONDITIONS, EXPRESS, IMPLIED OR STATUTORY, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR PARTICULAR PURPOSE. IN NO EVENT SHALL SELLER BE LIABLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES OF ANY NATURE.**

Only genuine Meritor replacement parts are covered by this aftermarket parts warranty.
